

Conceria Priante holds a significant position in the leather market, renowned for its exceptional craftsmanship and rich history. Since its foundation our tannery has become a symbol of excellence in the industry.

Throughout its history, Conceria Priante has established a strong reputation for producing high-quality leather products. Its commitment to traditional techniques and attention to detail have made it a preferred choice for brands and designers worldwide. The tannery's skilled artisans meticulously transform hides into exquisite leather, known for its durability, softness, and distinctive aesthetic.

Conceria Priante's relevance in the leather market is further amplified by its commitment to sustainability.

Recognizing the importance of responsible practices, the tannery implements stringent environmental standards and ethical sourcing methods. By embracing eco-friendly processes and reducing its carbon footprint, Conceria Priante contributes to a more sustainable and conscious leather industry.

Always believing that change initiatives are the key to a better future, we became a member of the Sustainable Apparel Coalition in 2020.

The Sustainable Apparel Coalition (SAC) is a collaborative initiative that brings together apparel, footwear, and textile industry stakeholders to drive sustainability. With its standardized Higg Index, the SAC provides a comprehensive framework for measuring and evaluating environmental and social impacts across the value chain. The SAC's relevance to the leather sector is crucial as it addresses key sustainability challenges and helps prevent environmental damage.

By aligning industry players and promoting best practices, it contributes to a more sustainable future, where environmental damage is minimized, and the well-being of workers in the value chain is improved.

The membership requirements of SAC offer a clear path for members to progress through four stages: foundational, progressive, strategic, and leader. Advancement to the next level necessitates members' adherence to best practices in adoption, verification, transparency, and impact, employing the Higg Index. By utilizing the Higg Index in these ways, SAC members establish the benchmark for sustainable leadership, while mobilizing the industry to tackle climate change and safeguard human rights.

We recently received information that we have advanced within the coalition to the **Progressive+** level.

This achievement was possible thanks to Conceria Priante's commitment to the requirements of the SAC and the engagement of the supply chain of JBS Couros Brasil, the main supplier of raw materials for the unit.

JBS Couros carried out social verifications in all its units around the world, in all there were 20 plants verified according to the Higg FSLM, with the exception of Uruguay that carried out the SMETA Pilar II.

The engagement was recognized by the SLCP, Social and Labor Convergence Program, Higg's partner entity in the application of the social protocol. See below the video produced in partnership between SLCP and JBS Courous.

See below a brief summary of our experience in the year 2022 in the verification cycle promoted by Higg.

- **Facility Environmental Module**

As a highlight within the environmental verification, we have the significant improvement in our result related to the Environmental Management System and Chemical Management, which present the greatest positive variations in performance, being the result of consistent work over the years, understanding the points of improvement and investing in the development of actions and projects within these themes.

### Environmental Impact Areas

### 2020 - 2021 Comparison

IMPACT AREA	POINTS	LEVEL
Emissions to Air	+15	▲
Energy Use & Green House Gas Emissions	+10	●
Water Use	+22	●
Waste Water	+25	▲
Waste	+38	▲
Environmental Management System	+60	▲
Chemical Management	+61	▲

- **Facility Social and Labour Module**

In the social module, we maintained the good performance of previous years. At all points evaluated, we obtained scores above 98% of compliance, Step 1, indicating that we are moving in the right direction, in search of the social well-being of our collaborators.

A reason for joy for our team is knowing that we achieved 100% compliance in Worker Treatment and Work Involvement, which demonstrates the satisfaction of our employees in working with us, as well as the respect for their individuality and freedom of expression and association, which it is so important for maintaining balance and harmony in the work environment.
